# Mythware V2.6
Classroom Management

mythware

(Android Teacher + Android Students)

Classroom Management for Android is designed to make teaching and learning more convenient and efficient with a 1:1 e-learning infrastructure. Once this magical classroom solution is installed on tablets, teaching and learning can take place both inside and outside the classroom, even at home.

Optimized for Wireless environment and designed with a friendly, simplified interface, Classroom Management for Android provides a smooth, secure and easy-to-use experience, which can effectively assist teaching and learning. It is also featured with maximum compatibility and stability, so it can be used for long teaching hours and work together with other applications.

Other than meeting the goal of giving every student a personalized education channel, Classroom Management for Android also enables teachers to instruct and monitor students visually. Teachers can interact with individual student, or with the entire class. Hence much of the burden on teaching can be lifted.

Benefits of Classroom Management

Teacher Interface

With a range of features, Classroom Management for Android helps teacher to control and manage the class effectively, supervise students' activities and maintain a good order in class.

Interactive Teaching

The one-to-one teaching mode helps teachers to develop an interactive teaching process and makes students better focused in class. Teachers can send learning materials to students, and collect students' files for inspection and evaluation.

Powerful Management

In order to make the classroom management easier and more convenient, Classroom Management for Android allows automatic connection between students' tablets and teachers'. Teachers can shut down or reboot students' tablets in a single action.

Effective Control

With Classroom Management for Android, teachers can monitor the screens of students to see the applications and websites they have opened. To improve learning efficiency, teachers can blank students' screens to gain attention.

Teaching Evaluation

With a set of practical features, Classroom Management for Android allows teachers to evaluate students by conducting quiz. Teachers can also conduct an instant survey with a single question. They are useful tools for assessing individual learning outcome in class.
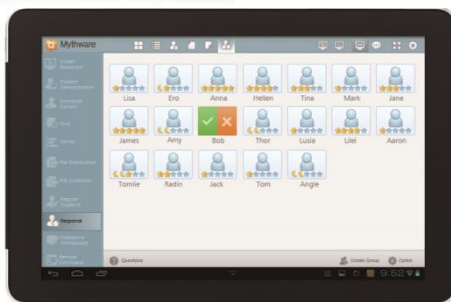

Interactive Teaching

Broadcast Screen

- Broadcast the teacher's screen to the students instantly.
- Use screen pen to annotate on the screen.
- Change the display mode of the screen broadcast displayed on students' screens.
- Students can take screenshots during the broadcast.

Student Demonstration

- Select one student to display his/her screen to the teacher and other students.

(Screen Broadcast)

Response & Competition

- Conduct a competition with individuals or groups by kinds of question types.
- Use an award system to assess the performance of students.

Interactive Whiteboard

- Share the drawing board with students and draw a painting together.
- Monitor students when they draw a painting independently.
- Select one student to demonstrate his painting to others.

(Response & Competition)

(Windows Teacher + Android Students)

Considering that sometimes teachers prefer to use windows PC, we also provide another solution which could support connection between Android students and Windows teacher. The teacher could choose the preferred solution for the class.

In addition, the Windows teacher still have another two functions.

Net Movie
- Play local and online media files to entire class or the selected students.

Camera
- Broadcast the pictures from the teacher's camera to all or selected students.
